

ABEC is a consulting services company designed to search for funding opportunities, provided by national or community funding programs while offering the opportunity for their realization with the help of our experienced engineers.

ABEC constantly expanding its services, being in response to the industry needs and requirements, offers through the specialization, experience and its partners complete solutions that cover all sectors and establish the company as a “one stop shop” of modern understanding.(perception)

We offer our specialized services in studying and planning investment business plans, either at the stage of establishment and start-up of an enterprise or for the modernization, expansion or relocation of an existing. This is achieved through the elaboration of an economic-technical study, as through that the degree of business risk is detected from the beginning and the creation of stillborn activities is averted. This way the success of the business plan is almost guaranteed.
