

Mission

Our mission is the constant search of new business opportunities, tracking, developing and execution of new and innovative ideas, using the funding opportunity knowing the business risks and the reliable realization of the plans. Providing with high level specialized consulting services, which cover a great range of existing and future needs of each company, regardless of the size and category of the products-services, having the company-client as the center.

Goal

Our goal is to provide practical solutions concerning the prevention and dealing with the problems of our clients, in a way that we will continue to be recognized as Consultants that offer innovative services, comprehensive and of high quality level.

Vision

Our vision is to continuously develop, enrich our services, and our expansion to other markets, always based on long-term collaborations and respecting the unique needs of each client, in order for ABEC to continue being a pledge of quality and comprehensive scientific services in the field of Energy and Constructions.
